

Front End Website Developer

We are seeking a talented **Front End Website Developer** with a graphic design background to join our team. This person is expected to be a self-starter and will be responsible for creating seamless and effective assets for websites, landing pages and email marketing. This team member will need to be able to hit the ground running with all their creative knowledge in web solutions and graphic design in a fast-paced environment, working independently and with the creative team. If you're interested in creating a user-friendly environment by writing code and moving forward in your career, then this job is for you. We expect you to be a tech-savvy professional, who is curious about new digital technologies and aspires to combine usability with visual design. Ultimately, you should be able to create a functional and attractive digital environment for our company, ensuring great user experience.

*** No applicant will be considered without samples of work.**

Duties and Responsibilities

- Work closely with our creative team and project managers to ensure clean workflow of projects through discovery, design, development, final approval and delivery
- Design and implement new website features and content, including graphic elements, site navigation and layout of content
- Ability to troubleshoot difficult or sensitive problems and find positive solutions while maintaining both short and long-term deadlines
- Regularly research emerging web technologies and industry trends
- Work with the team to create email campaigns, from design to distribution
- Ensure high quality graphic standards and brand consistency

Minimum Requirements and Skills

- Bachelor's degree in a related field; or equivalent combination of education required
- Proficient with HTML/HTML5 and CSS/CSS3, some experience with JavaScript and jQuery
- Knowledge of content management systems, such as WordPress
- Proficient with Adobe Suite (Photoshop, Illustrator, and Acrobat)
- Knowledge of search engine optimization practices and principles
- Strong understanding of typography, color, layout and website interaction
- Knowledge in computer technology, the Internet and MS Office.
- Familiar with both Mac and PC

Knowledge, Skills, Abilities

- Strong attention to detail and organizational skills that reflect ability to perform and prioritize tasks
- Excellent written and verbal communication skills
- Ability to work as part of a team and independently in a busy creative department, collaborating with several developers, graphic designers and project managers.
- Mature, responsible and self-motivated with a strong work ethic
- Maintain positive attitude when dealing with all team members and clients
